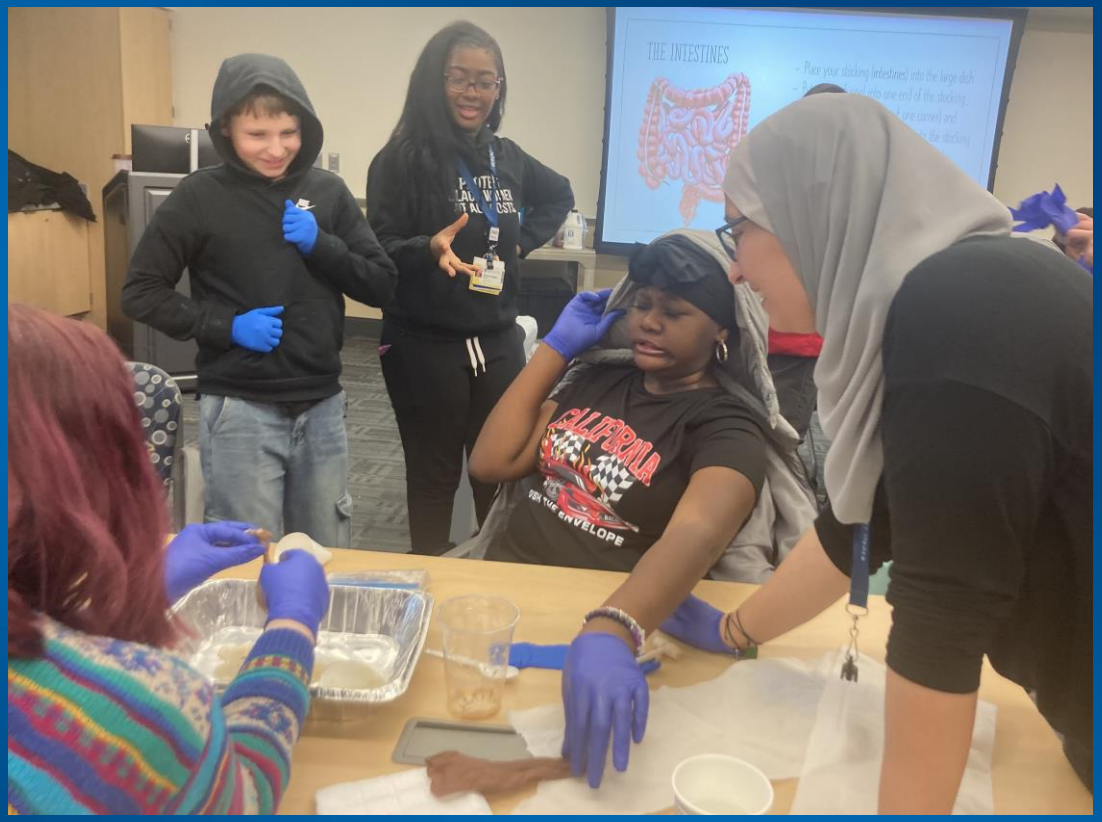
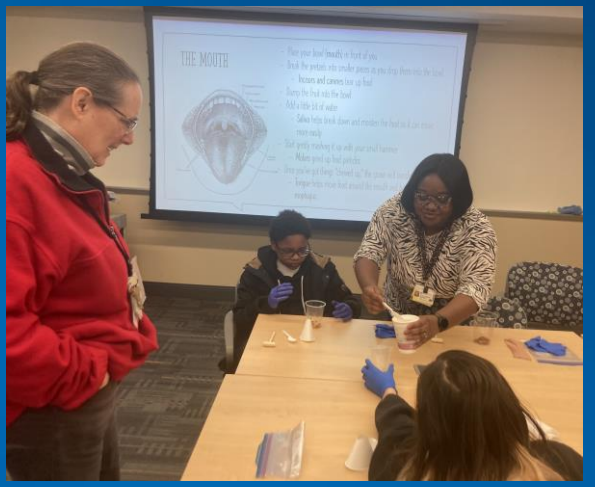
DOM Shares Science in Action:
Students build a model of the GI tract

Pathways Program led an engaging and wonderfully messy Mini Med School with the Rochester Young Scientists Club. Area fifth and sixth graders had a blast creating a model of the GI tract and learning about gastroenterology!





Janice Cheong, MD, Marie Laryea, MD, Maisa Abdalla, MD, Allison Magnuson, MD, and Joanna Abaraoha, MD, volunteered for an afternoon of creative, hands-on learning designed to spark excitement about making discoveries and inspire tomorrow's scientists.
