

Front Load 950 Series

*Powered by A.I. and
the Only Washer with
UltraFresh Vent System+*

Overview

GE Profile has optimized cleaning so you can learn to love laundry day. The GE Profile Front Load 950 Series **uses adaptive intelligence** to give the ultimate customization of powerful clean and fabric care while eliminating the guess work.

How It Works

Simply select a pre-programmed cycle and dial in your preferred setting of clean and care, then let your machine do the rest.

The Top Load 950's **adaptive intelligence will learn your preferences over time** and auto-select options on future cycles according to your previous loads while **SmartDispense Technology** portions the right amount of detergent for every load. The dryer will pick up where the washer left off with the ideal settings based on your wash cycle. Now that's **smarter cleaning**.

The Front Load 950 Series is equipped with innovative, industry-leading features that customize your wash to be as unique as you are, including:

- **UltraFresh™ Vent System+** detects and removes excess moisture to help prevent odors and ensure your washer stays fresh and clean. Say goodbye to that front load washer smell for good!
- **Microban® Antimicrobial Technology** is built into components including the gasket, dispenser and draining system delivering protection that lives on load after load.
- **1-Step Wash + Dry** lets you wash and dry a small load entirely inside your washer without needing to transfer clothing to your dryer.
- **Adaptive SmartDispense™** saves you time and effort by holding up to 32 loads of detergent and intelligently dispensing the right amount based on your choice of detergent. No more worrying about if you put in too much, or too little, detergent again.
- **Smart Features Powered by SmartHQ™** ensures your washer and dryer always have the latest features, including extra cycles for active wear and casuals, customized stain removal technology, as well as the ability to easily control and monitor your laundry from anywhere. Like that fine wine whose stain you're trying to remove, your Top Load 950 will only get better with time.
- **Adaptive MySettings** learns your laundry preferences load by load so your washer can personalize your cycle selections automatically. Say hello to your new personal laundry assistant!
- **Dryer with Steam Sanitize** reduces certain bacteria by 99.9%, refreshes small loads, and de-wrinkles larger loads with the power of steam. The perfect cycle for those winter blankets you keep in the attic.
- **Smarter Wash Technology** automatically senses the amount of dirt and grime in the water and adjusts the cycle to clean the exact amount, avoiding over- and under-washing, wasting time, water and energy.

How to Buy

The GE Profile Front Load 950 is available now at retailers nationwide starting for a MSRP of \$1,549 in Carbon Graphite. For more information on the product, visit geappliances.com/profile-laundry.
