

Top Load 900 Series

*The first washer and dryer
powered by Alexa*

Overview

GE Profile has optimized cleaning so you can learn to love laundry day. The GE Profile Top Load 900 Series is the smartest in its class,* featuring the first-ever washer with voice assistant with built-in Alexa that lets users dance to their favorite song, check the weather and set their clean cycles to specific care instructions or stain removals with a simple command.

How It Works

To put the washer into action, simply ask your washer which settings are best via our **Voice Assistant with Built-In Alexa** and rely on **SmartDispense Technology** to portion the right amount of detergent for every load.

Then, move your clothes over to the dryer and push (or say) “Start” and voila! The unit will know exactly what to do based on your wash settings.

The Top Load 900 Series is equipped with innovative, industry-leading features that give you your Sunday (or any day) Fun Day back, including:

- **Voice Assistant with Built-In Alexa** backed by GE’s laundry database automatically sets your washer and dryer for specific fabrics or adjusts washer settings for optimal stain removal, with hundreds of fabrics and stains programmed and counting. “Hey, Alexa, tell SmartHQ to wash my jeans and play that new song I like.”
- **Microban Antimicrobial Technology** is engineered to stay fresh and clean, using first-of-its-kind technology to help prevent the growth of odor-causing bacteria.
- **Fabric Refresh in the Dryer** allows you to refresh lightly-worn items without needing to run an entire wash cycle, because those coats coming out of storage are clean after all, right?

- **SmartDispense** gives you the ability to adjust the amount of detergent dispensed depending on the size of the load directly in-app – plus it holds up to 50 oz. of detergent so you can set it and forget it.
- **Smart Wash & Smart Rinse** automatically senses the amount of dirt and grime in the water and adjusts the cycle to clean the exact amount, avoiding over- and under-washing, wasting time, water and energy.
- **Built in Wifi** allows owners to have the units connected to and communicate with the SmartHQ app, to easily control and monitor your laundry from anywhere, receive remote status notifications, and more. Plus, your washer re-orders your laundry favorites when they’re running low. No shopping list required!
- **Enhanced Smarter Wash Technology** enables greater control for optimization of cleaning power and fabric care within each cycle – because every load is unique.
- **Easier Access Capacity** means you enjoy maximum capacity while still being able to easily reach the bottom of the tub.

How to Buy

The GE Profile Top Load 900 will be available for purchase at retailers nationwide in June 2022 starting at MSRP of \$1,199. It will come in Diamond Gray and Sapphire Blue. For more information on the product, visit geappliances.com/profile-laundry.

*Only top load washer among leading brands that can automatically adjust the time based on dirt and detergent levels.
