AIR&WATER
SOLUTIONS

OVERVIEW

[GE Appliances Air & Water Solutions](#) is a U.S.-based business unit of GE Appliances, a Haier company, that designs and manufactures heating, cooling, and water systems for residential and commercial applications. The business serves professional contractors, distributors, property owners, and builders across the United States.

Headquartered in Louisville, Kentucky, GE Appliances launched its dedicated Air & Water Solutions business in 2020, building on decades of [innovation](#) in air and water technologies and home appliances. Today, the business delivers reliable, energy-efficient systems designed for real-world performance, installation, and service.

WHAT GE APPLIANCES AIR & WATER SOLUTIONS DOES

GE Appliances Air & Water Solutions provides a portfolio of HVAC and water systems designed for performance, efficiency, and ease of installation in residential and commercial environments.

Core capabilities include:

- Designing HVAC and water systems for new construction and replacement
- Dedicated teams developing industry-leading technology
- Distributing through a national contractor and distributor network
- Supporting professionals through training, service, and technical expertise
- Enabling connected performance through SmartHQ technology

WHERE SYSTEMS ARE USED

- Single-family homes
- Multifamily housing
- Hospitality properties (hotels and lodging)
- Commercial buildings

Systems range from single-unit installations to large-scale deployments supporting multi-building properties and complexes.

MANUFACTURING, DISTRIBUTION, AND INVESTMENT

GE Appliances Air & Water Solutions operates an integrated platform across manufacturing, distribution, and support to serve professionals across the U.S.

- **Manufacturing:** Plants in [Camden, South Carolina](#) and [Selmer, Tennessee](#)
- **Distribution:** National network of 14 distribution centers and 103 local delivery sites
- **Investment:** \$98.5 million planned investment over five years to expand infrastructure, manufacturing, and innovation in the U.S.

PROFESSIONAL CHANNEL AND SUPPORT

The business is designed to support professionals in the field through a dedicated, pro-focused ecosystem.

- Over 2,000 dealers participating in the [Pro Solutions Partner Program](#)
- Five regional training centers across the United States (California, Texas, Kentucky, South Carolina)
- National technical training and support teams
- Flexible logistics and delivery capabilities

A LEGACY OF INNOVATION IN AIR & WATER

Notable innovations include:

- Development of packaged terminal air conditioners (PTAC), widely used in the hospitality industry
- Early advancements in heat pump HVAC systems
- Introduction of GeoSpring™ heat pump water heaters as energy-efficient alternatives
- Early development of food waste disposer technology

This legacy continues to inform current product development and next-generation system design.

WHY IT MATTERS

GE Appliances Air & Water Solutions supports modern building needs through energy-efficient, connected, and reliable HVAC and water technologies. The business plays a role in advancing electrification, improving energy performance, and helping professionals deliver high-quality solutions across residential and commercial environments.
