

Fusing Italian flair with British ingenuity, the partnership between Bowers & Wilkins and Maserati extends far beyond our shared passion for engineering excellence and technological innovation.

For nearly a century, the trident marque has been a symbol of automotive excellence, and the Quattroporte delivers on that promise. It also offers a truly immersive in-car acoustic experience, thanks to the Bowers & Wilkins Surround Sound System. Extraordinary sound for an extraordinary car.

A Passion for Technology

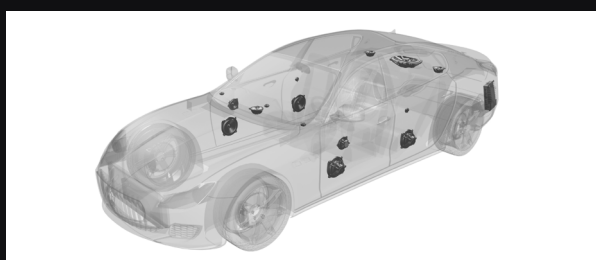

Aramid Fibre

A signature Bowers & Wilkins innovation, Aramid Fibre midrange drive units help to prevent distortion in the midrange and improve off-axis performance – especially important on the move.

Rohacell®

Used in the Quattroporte's bass cones, Rohacell is a highly advanced composite material used in aircraft and racing car design, offering the ideal balance of lightness and rigidity.

Integration

The Quattroporte's speaker placement has been designed with the car's unique cabin architecture in mind, ensuring an immersive audio experience, no matter where you're sitting.

Tuning

All Maserati systems have been tuned after hours and hours of listening, by the same team of expert engineers responsible for our flagship Hi-Fi range: the 800 Series Diamond.

The quest for true, unadulterated sound drives everything Bowers & Wilkins does. Our car systems are no exception. With each of our partners we work relentlessly to progress car audio to new technological heights. The ultimate goal: to achieve True Sound for each unique cabin architecture and driving experience.

Specification

Speakers

Number of speakers: 15

5 × 25mm Aluminium Tweeters (dashboard L/C/R, rear doors)

5 × 100mm Aramid Fibre Midrange
(front doors, centre-dashboard, parcel shelf)

2 × 160mm Rohacell® Bass Driver (front doors)

2 × 160mm Aramid Fibre Bass/Midrange Driver (rear doors)
