JBL PREMIUM SOUND SYSTEM WITH CLARI-FI FOR THE KIA E-NIRO

ELECTRIC CAR – ELECTRIFYING SOUND

One step ahead of the future. The Kia e-Niro delivers a level of performance along with smart assistance systems that other electric vehicles can only dream of. The same is true for the dreamlike JBL Premium Sound System – eight speakers and a 320-watt, eight-channel amplifier deliver an energizing listening experience.

CLARI-FI TECHNOLOGY

- Compressing audio files can discard up to 90 percent of the original audio content captured in the studio.
- Clari-Fi automatically analyzes and improves the audio quality of all types of compressed, digital audio formats in real time.
- It transforms the listening experience back to a precompression era, by restoring lost signals.
- Delivers a rich, uncompromised listening experience from any compressed music source.

JBL PREMIUM SOUND SYSTEM

- **Immersive Sound:** Eight speakers. Precise placement. Captivating sound, from behind the wheel, to the back seat.
- **Bold Performance:** Power you feel in your core. With up to 320 watts, the amp delivers high-energy sound that moves you.
- **Simply More Sound:** High-performance speakers meet award-winning technology for an unforgettable experience.
