

2026 COLORADO INTEGRATED CUSTOMER PROGRAM FILING

MAKING OUR EXISTING PROGRAMS AS EFFECTIVE AND IMPACTFUL AS POSSIBLE

We're committed to delivering a cleaner energy future our customers and communities want while expanding choices and keeping costs as low as possible. Our voluntary programs play an important role by giving customers tools to manage their energy use and budget and reduce their carbon footprint. By helping people use energy more efficiently, we can maintain system reliability and potentially avoid more costly investments in the future to meet demand.

Our Integrated Customer Program proposal enhances options — like energy efficiency, conservation, transportation electrification, demand management and beneficial electrification — to better serve our customers. We're taking the most successful approaches and adjusting to improve our offerings while ensuring they are both inclusive and cost-efficient. These changes allow us to continue helping customers find ways to save, lower emissions and deliver measurable results with transparency and accountability.

OUR PROPOSAL BENEFITS CUSTOMERS BY:

Making programs easier to understand, access and use.

Delivering system wide value and reliability that benefits everyone.

Strengthening support for customers in need.

Expanding cleaner energy and conservation choices.

Saving money with rebates and incentives that may help lower energy use and monthly bills.

SAVE ENERGY AND MONEY

Earn rebates on **home** or **business** energy-efficiency improvements.

Get a personalized plan to reduce energy use with a **Home Energy Squad** visit or a **business energy assessment**.

Take advantage of our **home EV charging incentives** or **business EV infrastructure rebates**.

ENHANCED PROGRAMS, MORE VALUE

We're supporting Colorado's transition to cleaner transportation by expanding electric vehicle (EV) charging access and directing customer support where it delivers the most value. Our **Transportation Electrification Plan Portfolio** focuses on incentives for homes, businesses, fleets and communities, including smart charging to save customers money while helping keep the grid reliable and costs in check.

Our **Demand Side Management Plan Portfolio** helps customers use energy more efficiently to save on their bills, reduce strain on the grid and keep system costs down — which helps keep rates lower for everyone. These offerings include rebates for efficient upgrades, personalized tools and advice and programs that pay customers to shift the timing of their energy use when demand is high.

We're making it easier for customers to save energy and choose cleaner heating options through flexible solutions like rebates, electrification and other programs designed for different needs and budgets. Our **Clean Heat Plan Portfolio** is designed to lower emissions over time while maintaining safe, reliable service and supporting a gradual transition to cleaner energy.

2026 COLORADO COMBINED CUSTOMER PROGRAMS FILING**SMARTER SYSTEM PLANNING**

Our customer programs and system planning work together as one coordinated strategy — helping manage when, where and how energy is used. By integrating programs with traditional infrastructure investments, we're making customers an essential part of how we plan for the future. The result is a more flexible, resilient system built around how customers use energy today and what the grid will need tomorrow.

HOW TO GET INVOLVED

The Colorado Public Utilities Commission will review our proposal in the coming months. If you would like to provide a comment for their consideration, you can:

- Visit puc.colorado.gov/participate and fill out their online form.
- Email dora_puc_website@state.co.us.
- Send a letter to: Colorado Public Utilities Commission, 1560 Broadway, Suite 250, Denver, CO 80202.
- Call **(303) 869-3490** anytime and leave a verbal comment.
- Participate in a public comment hearing. Visit puc.colorado.gov/pucalendar to see a schedule of upcoming hearings.
